The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6,36-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims (6,38) recite no particular method steps or structure for achieving the recited result. It merely requires a FQPSK modulation technique wherein a signal having no slope discontinuity is produced. The claims do not cite how the FQPSK signal having no slope discontinuity is generated. (See page 23, lines 6-19)

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Kato (4,567,602).

Kato discloses a method for coding signal producing FQPSK signal that has no slope discontinuity. (The claim does not say that the entire FQPSK signal being the I and Q symbols or Full symbol)
